quel age a anne cadoret: Parenté plurielle Anne Cadoret, 1985-01-01 Certains enfants se trouvent séparés de leurs familles d'origine et confiés à d'autres familles, dites d'accueil. Des liens de parenté peuvent s'instituer entre ces familles d'accueil et les enfants placés. On se dit alors comme un frère, comme une mère, comme une fille... Anne Cadoret est allée pendant plusieurs années parler famille avec les habitants du Morvan, région réputée pour sa tradition d'accueil des enfants de l'Assistance publique puis de la DDASS. Elle montre comment se construit cette parenté étrange qui ne se fonde ni sur des liens biologiques ou juridiques mais seulement sur des liens sociaux et des sentiments ; cette parenté qui ne transmet ni noms ni biens mais seulement un cadre familial. Elle montre aussi que si forte soit cette parenté d'accueil, elle ne supprime jamais l'interrogation sur la parenté d'origine et les raisons du placement.--

quel age a anne cadoret: Relative Values Sarah Franklin, Susan McKinnon, 2002-02-22 The

essays in *Relative Values* draw on new work in anthropology, science studies, gender theory, critical race studies, and postmodernism to offer a radical revisioning of kinship and kinship theory. Through a combination of vivid case studies and trenchant theoretical essays, the contributors—a group of internationally recognized scholars—examine both the history of kinship theory and its future, at once raising questions that have long occupied a central place within the discipline of anthropology and moving beyond them. Ideas about kinship are vital not only to understanding but also to forming many of the practices and innovations of contemporary society. How do the cultural logics of contemporary biopolitics, commodification, and globalization intersect with kinship practices and theories? In what ways do kinship analogies inform scientific and clinical practices; and what happens to kinship when it is created in such unfamiliar sites as biogenetic labs, new reproductive technology clinics, and the computers of artificial life scientists? How does kinship constitute—and get constituted by—the relations of power that draw lines of hierarchy and equality, exclusion and inclusion, ambivalence and violence? The contributors assess the implications for kinship of such phenomena as blood transfusions, adoption across national borders, genetic support groups, photography, and the new reproductive technologies while ranging from rural China to mid-century Africa to contemporary Norway and the United States. Addressing these and other timely issues, *Relative Values* injects new life into one of anthropology's most important disciplinary traditions. Posing these and other timely questions, *Relative Values* injects an important interdisciplinary curiosity into one of anthropology's most important disciplinary traditions. Contributors. The juxtaposition of epidemiological, intervention, animal and neurobiological studies represents a new stage in the evolution of drug research, in which epidemiology and biology inform one another in the understanding of drug abuse.

quel age a anne cadoret: The Metamorphoses of Kinship Maurice Godelier, 2012-03-03 With marriage in decline, divorce on the rise, the demise of the nuclear family, and the increase in marriages and adoptions among same-sex partners, it is clear that the structures of kinship in the modern West are in a state of flux. In *The Metamorphoses of Kinship*, the world-renowned anthropologist Maurice Godelier contextualizes these developments, surveying the accumulated experience of humanity with regard to such phenomena as the organization of lines of descent, sexuality and sexual prohibitions. In parallel, Godelier studies the evolution of Western conjugal and familial traditions from their roots in the nineteenth century to the present. The conclusion he draws is that it is never the case that a man and a woman are sufficient on their own to raise a child, and nowhere are relations of kinship or the family the keystone of society. Godelier argues that the changes of the last thirty years do not herald the disappearance or death agony of kinship, but rather its remarkable metamorphosis—one that, ironically, is bringing us closer to the “traditional” societies studied by ethnologists.

quel age a anne cadoret: Two Sisters and Their Mother Françoise Héritier, 1999 An anthropologist's view of the incest taboo through and across cultures, including a new interpretation of kinship that emphasizes the primacy of the symbolic. The sharing of a sexual partner between relatives has always been taboo. In this stunning work, anthropologist Françoise Héritier charts the incest prohibition throughout history, from the strict decrees of Leviticus to modern civil codes, and finds a secondary type of incest, which she calls the incest of two sisters. The term refers not to incest between two sisters, or between two sisters and their mother, but to a love triangle of sorts in which the transfer of bodily fluids among sexual partners, two of whom are related to each other, creates undeniable bonds. Drawing on her field work in West African societies where the bans against two sisters are particularly stringent and on various cultural practices (such as milk kinship), Héritier fashions a complex mechanics of fluids in which blood, milk, and semen form the basis for kinship and prohibition. The intricate connections among the social, the natural, and the bodily emerge, fully apparent, and kinship studies are seen in a new light, one that illuminates the primacy of the symbolic.

This is the first extended study of Algeria's post-independence Arabic literature in a European language.

quel age a anne cadoret: *International Adoption* Laura Briggs, 2009-07-01 In the past two decades, transnational adoption has exploded in scope and significance, growing up along increasingly globalized economic relations and the development and improvement of reproductive technologies. A complex and understudied system, transnational adoption opens a window onto the relations between nations, the inequalities of the rich and the poor, and the history of race and racialization. Transnational adoption has been marked by the geographies of unequal power, as children move from poorer countries and families to wealthier ones, yet little work has been done to synthesize its complex and sometimes contradictory effects. Rather than focusing only on the United States, as much previous work on the topic does, *International Adoption* considers the perspectives of a number of sending countries as well as other receiving countries, particularly in Europe. The book also reminds us that the U.S. also sends children into international adoptions—particularly children of color. The book thus complicates the standard scholarly treatment of the subject, which tends to focus on the tensions between those who argue that transnational adoption is an outgrowth of American wealth, power, and military might (as well as a rejection of adoption from domestic foster care) and those who maintain that it is about a desire to help children in need.

quel age a anne cadoret: *The Kinning of Foreigners* Signe Howell, 2007 Since the late nineteen sixties, transnational adoption has emerged as a global phenomenon. Due to a sharp decline in infants being made available for adoption locally, involuntarily childless couples in Western Europe and North America who wish to create a family, have to look to look to countries in the poor South and Eastern Europe. The purpose of this book is to locate transnational adoption within a broad context of contemporary Western life, especially values concerning family, children and meaningful relatedness, and to explore the many ambiguities and paradoxes that the practice entails. Based on empirical research from Norway, the author identifies three main themes for analysis: Firstly, by focusing on the perceived relationship between biology and sociality, she examines how notions of child, childhood and significant relatedness vary across time and space. She argues that through a process of kinning, persons are made into kin. In the case of adoption, kinning overcomes a dominant cultural emphasis placed upon biological connectedness. Secondly, it is a study of the rise of expert knowledge in the understanding of 'the best interest of the child', and how the part played by the 'psycho.technocrats' effects national and international policy and practice of transnational adoption. Thirdly, it shows how transnational adoption both depends upon and helps to foster the globalisation of Western rationality and morality. The book is an original contribution to the anthropological study of kinship and globalisation.

quel age a anne cadoret: *Food, Health and Safety in Cross Cultural Consumer Contexts* Derek V. Byrne, 2021-08-17 The concept of cross-cultural perspectives in research in food is important in general and particularly so in relation to human perception in food and health. Food concepts are very different across different jurisdictions. Different markets and cultures have varying perspectives on what is considered a palatable, acceptable, or useful food or food product; in simple terms, one size does not at all in the majority of cases. Specific markets thus need targeted food design, to be successful from a myriad of perspectives. In this Special Issue anthology *Food, Health and Safety in Cross-Cultural Consumer Contexts*, we bring together articles that show the wide

range of studies from fundamental to market applicability currently in focus in sensory and consumer science in food, health, and safety cross-cultural contexts. From the included perspectives, it is abundantly clear that there is a need for much knowledge related to future food design linked to cross-cultural contexts and that this will continue to be critical to the success of food transfer in global food markets.

quel age a anne cadoret: *Cities in Contemporary Europe* Arnaldo Bagnasco, Patrick Le Galès, 2000-05-11 European cities are at the centre of social, political and economic changes in Western Europe. This book proposes a new research agenda in urban sociology and politics applying primarily to European cities, in particular those that together make up the urban structure of Europe: a fabric of older cities of over 100,000 inhabitants, regional capitals and smaller state capitals. The contributors develop an analytical framework which views cities as local societies, and as collective factors and site for modes of governance. The three parts of the book examine the economics of cities, the social structures, and the modes and processes of governance. Each chapter comprises a comparison across several countries and examines critically the book's central theoretical perspective. This is not a book about the making of a Europe of cities but rather about how some cities can take advantage of their changing global and European environment.

quel age a anne cadoret: *Kinship Matters* Fatemeh Ebtehaj, Bridget Lindley, Martin Richards, 2006-09-15 This book is the fifth in the Cambridge Socio-Legal Group series and it concerns the evolving notions and practices of kinship in contemporary Britain and the interrelationship of kinship, law and social policy. Assembling contributions from scholars in a range of disciplines, it examines social, legal, cultural and psychological questions related to kinship. Rising rates of divorce and of alternative modes of partnership have raised questions about the care and well-being of children, while increasing longevity and mobility, together with lower birth rates and changes in our economic circumstances, have led to a reconsideration of duties and responsibilities towards the care of elderly people. In addition, globalisation trends and international flows of migrants and refugees have confronted us with alternative constructions of kinship and with the challenges of maintaining kinship ties transnationally. Finally, new developments in genetics research and the growing use of assisted reproductive technologies may raise questions about our notions of kinship and of kin rights and responsibilities. The book explores these changes from various perspectives and draws on theoretical and empirical data to describe practices of kinship in contemporary Britain.

quel age a anne cadoret: *The Western Abenakis of Vermont, 1600-1800* Colin G. Calloway, 1994 Before European incursions began in the seventeenth century, the Western Abenaki Indians inhabited present-day Vermont and New Hampshire, particularly the Lake Champlain and Connecticut River valleys. This history of their coexistence and conflicts with whites on the northern New England frontier documents their survival as a people-recently at issue in the courts-and their wars and migrations, as far north as Quebec, during the first two centuries of white contacts. Written clearly and authoritatively, with sympathy for this long-neglected tribe, Colin G. Calloway's account of the Western Abenaki diaspora adds to the growing interest in remnant Indian groups of North America. This history of an Algonquian group on the periphery of the Iroquois Confederacy is also a major contribution to general Indian historiography and to studies of Indian white interactions, cultural persistence, and ethnic identity in North America Colin G. Calloway, Assistant Professor of History in the University of Wyoming, is the author of *Crown and Calumet: British-Indian Relations, 1783-1815*, and the editor of *New Directions in American Indian History*, both published by the University of Oklahoma Press. Colin Calloway shows how Western Abenaki history, like all Indian history, has been hidden, ignored, or purposely obscured. Although his work focuses on Euro-American military interactions with these important eastern Indians, Calloway provides valuable insights into why Indians and Indian identity have survived in Vermont despite their lack of recognition for centuries.-Laurence M. Hauptman, State University of New York, New Paltz. Far from being an empty no-man's-land in the seventeenth and eighteenth centuries, the western Abenaki homeland is shown in this excellent synthesis to have been an active part of the

stage on which the events of the colonial period were acted out. -Dean R. Snow, State University of New York, Albany. At last the western Abenakis have a proper history. Colin Calloway has made their difficultly accessible literature his own and has written what will surely remain the standard reference for a long time.-Gordon M. Day, Canadian Ethnology Service. Although they played a central role in the colonial history of New England and southern Quebec, the western Abenakis have been all but ignored by historians and poorly known to anthropologists. Therefore, publication of a careful study of western Abenaki history ranks as a major event.... Calloway's book is a gold mine of useful data.-William A. Haviland, senior author, *The Original Vermonters*.
